Marais Attorneys

The Maharishi Institute is a tertiary institution providing assistance to at risk youth in down town Johannesburg. Since its inception, the impact has been nothing short of astounding. Close to 18 000 youth have been assisted across all our programs and partner organisations to access higher education and quality employment. Many are now leaders across the economy. "We are grateful to have had an average of 98% job placement rate, which is unusual in that these have been drop-out youth who have been stuck and marginalised. These graduates are closely tracked, and earn over R1.050 billion combined salaries per annum and we estimate they will earn R28.5 billion conservatively over their working careers," says Dr Taddy Blecher, Co-founder and CEO of the Maharishi Institute.

Through our BEE deals, assisted by the Marais Attorneys, we have managed to continue to work and be sustainable. We are grateful for their un-ending support and generosity.
